Cricket

Music

ADDITIONAL INFORMATION

Throughout my professional career, I have primarily worked on frontend development using HTML5, CSS3, JavaScript, and jQuery, while also gaining hands-on exposure to React.js and Next.js within project environments. Although my core responsibilities have largely focused on traditional frontend technologies, I have continuously invested in expanding my expertise in modern JavaScript frameworks through practical learning and self-development.

I possess a solid understanding of React.js and Next.js fundamentals, component-based architecture, routing, state management concepts, and modern frontend development practices. I am eager to leverage and further strengthen these skills in a dedicated React.js / Next.js development role, where I can contribute effectively while continuing to grow as a frontend engineer.
